

Baccarat Variants

Although the question of "what is baccarat?" has now been fully answered, there is work yet to be done. In order to play the game, you need to actually pick an online title. To get the best one for you, you need to think about which variant best suits your tastes. Here are some of our favourite baccarat variants.

Punto Banco

This is the variant of baccarat that you will most likely see at online casinos. In fact, most games titled simply "baccarat" will actually be punto banco games. Originally, baccarat pitted player against player. In punto banco, all players bet against the house. This means that all products that use this name will follow the standard rules of baccarat. Of course, some little changes to the rules can be expected in any specific version.

Chemin de Fer

Chemin de Fer is the name given to the game that the French created hundreds of years ago when the game originally spread to France. The name means "railway", referring to the increased speed that the new variant brings versus the original. This is an unusual variant to find nowadays and includes some complicated rules. The most important thing about Chemin de Fer is that players make important decisions throughout each round and play against each other.

Mini Baccarat

Again, this variant is really not that different from the baccarat rules that we have discussed throughout this page. The only thing that denotes a mini baccarat game is the exclusion of unnecessary details on your screen when you play online. Lots of baccarat games will include lots of statistics about previous hands and display these in various different ways. This is often considered an integral part of playing baccarat, but mini baccarat gets rid of all of that.

Baccarat Banque

Baccarat Banque is essentially the same as Chemin de Fer with one crucial change. The role of the banker, who oversees the bets and deals cards, is not done by players on a rotational basis, but by a professional croupier at the behest of the house. As such, this is the type of Chemin de Fer that you will find in casinos, although it really is quite rare, especially outside of France.
