

Keno Game Rules: Three-Step Beginner's Guide

Before you start to bet on keno games with your own, hard-earned cash, it's essential that you make sure you know exactly what to expect. There is nothing worse than spending money on the first few games just to get to know what is happening. In order to help you out, here is a step-by-step guide on how to play keno.

1. Get Your Keno Card

Choose your favourite online keno game or head to your local gambling hall. Get your card and have a think about how much money you'd like to wager, and therefore how many numbers to choose.

2. Pick Your Numbers

It doesn't matter how you pick your numbers, whether they are your lucky digits, you and your friend's birthdays combined, or because they make a pretty pattern. Just pick them and cross your fingers!
